

Make a Physical Feature Map of Ancient Rome

Use the map on page 21 and the directions below to make a map showing the physical features of Ancient Rome.

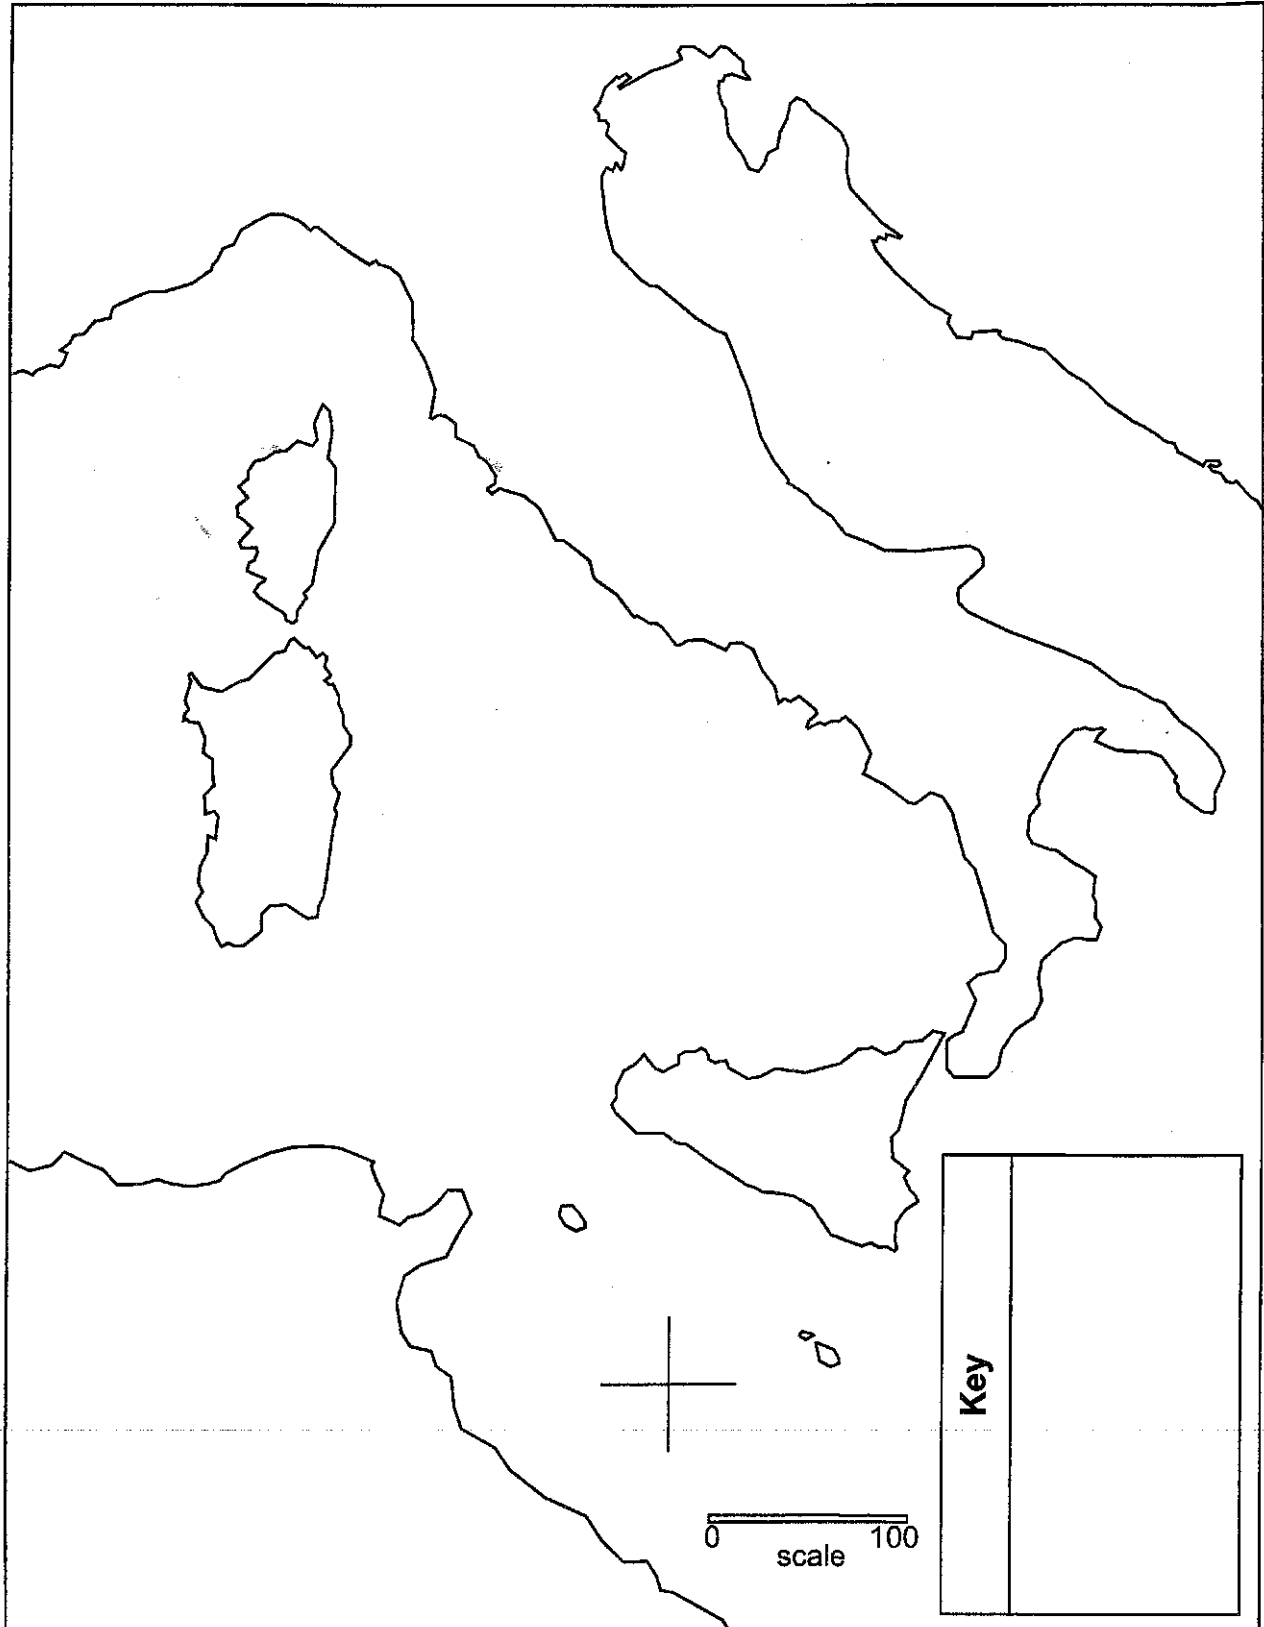

1. Locate, draw, and label the Apennine Mountains and the Alps. Color these two mountain ranges brown. Use triangles $\Delta \Delta \Delta$ as the mountain symbol.
2. Label the Mediterranean Sea, the Adriatic Sea, and the Ionian Sea. Color the seas blue. and the Tyrrhenian Sea.
3. Locate, draw, and label the Tiber River and the Po River. Color the rivers blue. Use squiggly lines $\approx \approx$ as the river symbol.
4. Locate and label the islands of Corsica, Sardinia, and Sicily. Color the islands yellow.
5. Locate, draw, and label the Tuscan Plain, the Latium Plain, and Campanian Plain. Color the plains green. Use straight lines $\equiv \equiv$ as the plain symbol.
6. Color the rest of the Italian coastline ~~yellow~~ purple. This means trace Italy in purple.
7. Locate and label Northern Africa. Color it red.
8. Locate, indicate, and label the cities of Rome, Alba Longa, and Naples. Use a black dot \bullet as the city symbol.
9. Make a compass rose on your map showing north, south, east, and west.
10. Make a map key showing what each symbol and color represents on your map.
- ~~11. Make a scale showing that 1 inch equals 100 miles.~~
- ~~12. Cut out your map and glue it onto a sheet of colored construction paper.~~
- ~~13. At the top clearly write The Geography of Ancient Rome and your name.~~
11. Answer the questions on the back on your labeled/colored map.

Name: _____

Block: _____

Geography

Map of Ancient Rome

Questions on back →

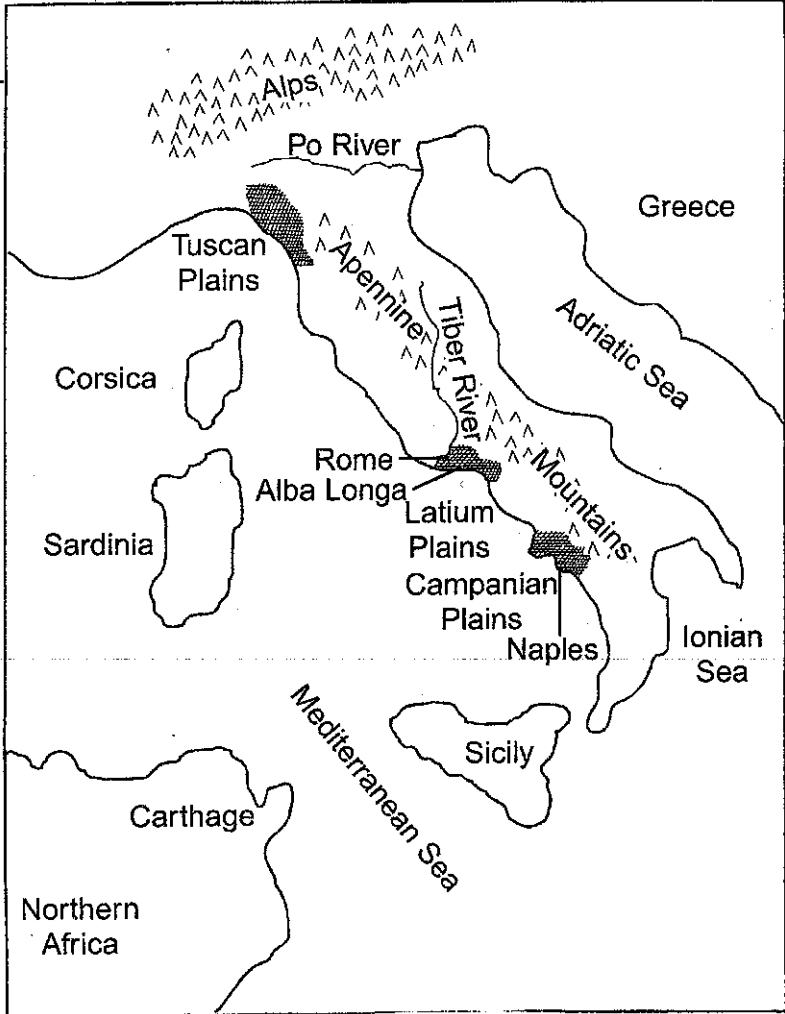

Only after you have completed the labeling and coloring of your map on the other side, answer these questions. Your answers will only be landforms which you labeled. Your answers do not need to be in complete sentences (except for #10, which needs to be 4 sentences).

1. Rome is the capital of which country?
2. Italy is a peninsula. Name the three (3) bodies of water that make it a peninsula.
3. Which river is immediately south of the Alps?
4. Which mountain range would protect Rome to its north and east?
5. Which city is immediately south of Rome?
6. Which body of water is northeast of Rome?
7. Which island is northwest of Rome?
8. Which country is southwest of Rome?
9. Which river runs through Rome?
10. Use at least **4 sentences** to describe in detail how someone might travel from Rome to the island of Sicily. In which direction(s) would you travel? Through what landforms would you travel?
